

What if you could...

...control your computer and on-screen projections from anywhere in the classroom?

The technology in the Interwrite® Pad allows you to teach from anywhere in the classroom (up to 300 feet!) or pass it to a student and let them contribute from their desk.

...take notes directly on your lessons, save them instantly and email them to your students?

Workspace ExamView® Edition provides a number of features to help you organize, retain and share information from your in-class instruction.

...grade exams and quizzes in seconds?

Classroom Performance System (CPS) clickers make formative assessment practical for any classroom setting. With CPS, student feedback is captured, tabulated and reported in an instant.
